

# **YEAR 1 PLANNING FOR THURSDAY 23<sup>RD</sup> APRIL 2020**

Dear Year 1,

I hope that you enjoyed the live meetings so far and that most of you have ironed out any connection issues. All assignments have documents attached to show you how to send me your work.

In your stream today there is a video explaining all the tasks and also reading out the work to prepare your child for the Science lesson. Please watch this video to understand the independent tasks and to follow my instructions. Thank you.

**You can email now me directly on [year1@calpeschoolonline.com](mailto:year1@calpeschoolonline.com). I will try to answer your questions as quickly as I can, when I am not in a 'live session'.**

Here is the list of what I would like you to do today – there should not be anything here that you find too tricky but if you do need some support then let me know.

## **LIVE MATHS**

### **Aim: to find 1 more and 1 less**

Come to the lesson with your worksheet and a pencil. I will explain all during the live lesson. I will present the work and explain the task then you will have independent time to complete the work. We will then come together at the end in smaller groups to share the answers.

## **LIVE LITERACY**

### **Aim: to create a silly story**

Come to the lesson your imagination hat firmly on. I will explain all during the live lesson. The material for you to use will go live at 9:10am. Please do not complete the work until instructed to do so in the lesson. I will present the work and explain the task then you will have independent time to complete the work. We will then come together at the end to share the answers.

## **LIVE SCIENCE**

### **Aim: to spot the odd one out**

Change of plan – we are not doing the graph today! I will explain all during the live lesson. The material for you to use will go live at 9:10am. Please do not complete the work until instructed to do so in the lesson. I will present the work and explain the task then you will have independent time to complete the work. We will then come together at the end to share the answers.

## **INDEPENDENT MATHS:**

### **Aim: To revise mental maths skills**

Go onto Numbots to practise your mental maths skills. Well done to those children who have been on Numbots so far! If you haven't logged in yet or practised your quick fire maths questions, please do this today. Your log in details should be in your folder that you took home from school a few weeks ago. The log in details may be different to your Active Learn details. If you can't log in, please ask me. You can either go onto Numbots through the green link in My stuff on your Active Learn account or connect using the link below.

<https://play.numbots.com/#/account/school-login/75715>

## **INDEPENDENT LITERACY**

### **Aim: To read a book on Bug Club**

On Active Learn, you now all have been allocated a Book Band with books that should be at your level. By clicking the little bug icon on each page, you will be asked questions to see if you understand the story. Make sure to answer the comprehension questions in order to see if the books are right for you.
